 - 5.3 Content Integration
6. Technical Requirements
7. Timeline and Milestones
8. Budget
9. References

1. Choose a Target

- 1.1 • Selected Category: Small Business -Carpentry
 - Choden Organization: Woodwork Carpentry

Project Goal

The primary goal of this project is to build a functional, user-friendly, and accessible website for Woodwork Carpentry. The website enables local residential and commercial clients to view custom timber offerings (bespoke furniture, built-in cabinets, office fit-outs), request on-site measurements or quotes, and locate the workshop easily.

2. Research and planning

2.1 Website Project Proposal

Proposal 1: Woodwork Carpentry

1. Organization Overview:

- Name: Woodwork Carpentry

- Brief History:

Founded in Polokwane, Woodwork Carpentry began as a local workshop delivering custom timber solutions, including handmade furniture, custom kitchen cabinets, and tailored office installations.

- Mission:

To construct durable, custom timber products tailored to individual customer needs with high-quality craftsmanship.

- Vision:

To become the leading trusted custom woodwork and cabinetry provider in Limpopo.

- Target Audience :

Homeowners, interior designers, corporate office managers, and property developers requiring custom carpentry solutions.

2. Website Goal and Objectives

- Goals: Increase local brand visibility, generate direct project enquiry leads, and showcase a organized catalog of past carpentry projects.
- KPIs: Track unique website visitors, measure form submission rates on the enquiry page, and monitor telephone/email click-throughs.

3. Current Website Analysis:

- Strengths: Strong community involvement and local volunteer support.
- Weaknesses: Relies solely on social media notices, lacking a centralized point for sponsor registration or structured information.
- Improvements: Develop an official site with dedicated volunteer/sponsor application forms.

4. Proposal Website Features and Functionality

- Homepage: News highlights, mission statement, and quick volunteer CTA.
- About Us: Organizational background, youth programs, and leadership team.
- Services/Programs: Breakdown of youth literacy, sports, and life skills workshops.
- Enquiry: Multi-functional enquiry form allowing users to sign up as volunteers or corporate sponsors.
- Contact: Direct contact details, map location, and general contact form.

2.2 Proposal

- Both proposals for review proposal one was chosen for primary development

3. Content Research and sources

3.1 Content Source

- Original Content: Written copy for product descriptions, workshop background, custom cabinetry options, and service enquiry prompts.
- Public Domain / Creative Commons: Royalty-free timber and carpentry stock photos utilized for placeholder project media.

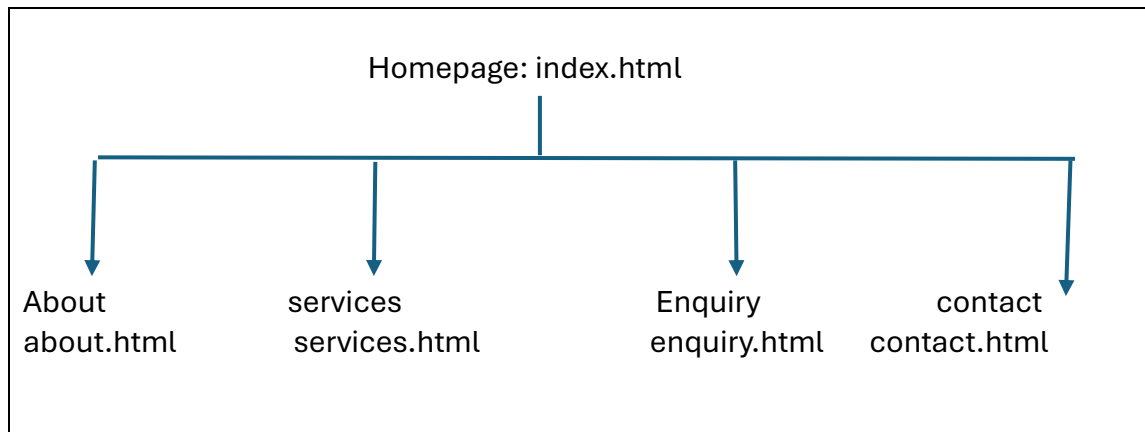

3.2 File Organization

- Project Root Directory

Woodwork_website

- subfolders:
 - images – contains logo and images
 - CSS- contains nothing
 - js- contains nothing

4. Website Structure and Planning

4.2 • index.html- homepage

- about.html – About us
- services.html- services and offerings
- enquiry.html – Custom services
- contact.html- contact information, google map, message form

5. Html Structure and Basic Content

5.1 All 5 HTML pages were created using clean, standards-compliant HTML5 markup without reliance on external CSS or JS frameworks for Part 1.

6. Technical Requirements

- Markup: HTML5 (Standard compliant).
- Editor: Visual Studio Code.
- Browser Compatibility: Google Chrome, Microsoft Edge, Mozilla Firefox.
